groov Action Plan

Features

❯ A complete *groov* mobile app customized for your systems and equipment

❯ Expert design and development by Opto 22 engineers, based on your needs

❯ Go mobile with minimal time and effort

groov operator interface on smartphone

Description

The *groov* Action Plan gives you a simple, effective mobile operator interface—your own custom mobile app designed for your automation systems and equipment—without having to build or configure it yourself.

The *groov* Action Plan offers a planned path from conception to completion. With the *groov* Action Plan, an Opto 22 engineer takes the time to understand your systems and your goals for a mobile operator interface. The engineer provides the following services and deliverables:

- *groov* project management
- 8 hours of support for configuration, IT, networking, and device connectivity
- 3 completed *groov* operator interface pages
- 2 hours of application support after the project is completed
- 1 year extended maintenance for *groov*

groov Project Management

groov project management includes expert guidance and coaching for the needs and challenges of your specific project. You and the Opto 22 engineer will discuss your systems and goals and complete *groov* Action Forms to lay out the project's objectives and schedule.

8 Hours of Support

During the 8 hours of support the engineer will address all of the following:

- Networking and IT coordination
- Device connectivity for OPC-UA servers, Modbus/TCP devices, and SNAP PAC controllers
- Tag definition
- User and account setup
- Optional IP camera configuration for monitoring areas with a web camera
- Event creation and logging, plus optional notification setup
- Android and iOS configuration for mobile devices

3 Completed *groov* Interface Pages

Your completed *groov* operator interface pages will include:
- 3 web pages optimized for both Desktop and Handheld views
- Up to 30 tags per page
- Trend configuration
- Event logging and optional notifications
- Live web camera images (optional)
- Your company logo

2 Hours of Post-project Application Support

After the project is completed and signed off, the engineer will also provide an additional 2 hours of application support to make sure your interface meets your needs. This support includes:

- Page changes
- Configuration changes in devices and tags
- Changing users and adding new users
- Product upgrades

The *groov* Action Plan is available for either the *groov* Box appliance or *groov* Server for Windows, and it includes one year of extended maintenance for *groov*.

The *groov* Action Plan is available in the U. S. A. and Canada. Call today for your free 30-minute consultation:
